What are Seconds?

Seconds are determined by breakages and minor cracks/chips from the manufacturing process. As a result, none of our seconds stock can be guaranteed.

Please call our sales team in advance if you wish to order seconds, as variations in stock occur daily.

Our Adapter Couplings (AC) band seal range are designed to join two types of pipes with different external diameters.

Our Drain Coupling range (DC) are manufactured to connect, repair & maintain drainage systems and other non-pressurized small diameter pipes.

Both ranges are comprised of nitrile rubber and stainless steel for improved corrosion resistance.

All measurements are given in mm.

Twin Wall - Quality Assurance

All our twin wall pipe range (excluding our 100mm) comes with a BBA approval enabling it to be used under roadways and other structures due to its reinforced structural strength.

Our full range is supplied in 6 metre lengths to reduce joints & improve leak resistance. In addition to this, the smooth interior design also allows for fast & effective hydraulic flow.

MDPE Pipe Quality

Maximum operating pressures of up to 16 bar across all sizes. Medium density polyethylene has significant advantages over other pipe materials. These include a flexible and light weight pipe with excellent chemical resistance and ease of welding with availability of coils. These properties contribute to its appeal in situations where cost effective and reliable systems are required.

Chain lift skip hire ranging from 4-12 cubic yards. Our chain lift skip hire range are ideal for any construction waste as well as household clearances. We also offer lockable enclosed skips to help manage lightweight waste.

For larger volumes of waste, we offer 15-50 cubic yard skips. Delivered on 8-wheeled hook lorries. Ideal for large waste collections on a regular basis. We also provide optional sheeted skips for light-weight material or harmful waste streams.

We offer a reliable & efficient bin collection service covering: Shropshire, Staffordshire, Cheshire & all surrounding areas. We offer a variety of different sized bins for numerous waste streams

Brand new edition to the euro bin division. Our new DAF CF 410 has already been dressed in one of our favourite charities - **Midlands Air Ambulance**.

Our main indoor tipping facility for farm & general waste. This site handles the following waste streams:

Cardboard Plastic Hazardous Bale Wrap/String Plastic Drums
Fertilizer Bags

Site Address:

Bensite, Warrant Road, Stoke Heath, Market Drayton

Our second indoor tipping facility for inert waste. This site processes:

Soil Rubble Green Wood Plasterboard End of Life Tyres
Alongside processing waste, this site also holds stock of all merchant materials and aggregates (quarried, decorative & recycled).

Site Address:

Warrant Hangar, Sutton Road, Tern Hill, Market Drayton

35T J40v2 McCloskey Crusher

Capable of crushing up to 800T of material per day (material dependent) with the option for a fines conveyor to remove excess soil content from product. Hire includes fuel & operator.

512R McCloskey Screener

Equipped with adjustable speeds for all belts alongside interchangeable trommel drums, ranging in size from 10-50mm giving you complete control over the size of your product. Hire also includes fuel & operator.

360° Excavators

Excavator services include demolition, dismantling of buildings/sheds, sleeper laying, silage clamp installation, lagoon dredging, earth movement & general groundworks. Multiple sized machines available to suit all jobs. Once again, al hire includes a skilled operator & fuel.
