### **Arctic Trailers:**

Our artic walking floors & curtain sided fleet are growing rapidly to keep up with the ever-increasing volumes of waste we now manage. We have 135m<sup>3</sup> walking floors and full-length curtain sided lorries. The walking floors are designed to haul loose waste like wood & plasterboard, while the curtain sided lorries are designed for palletised waste & bales.

### **Cat® MH3022 Material Handler**

The **Cat® MH3022** is a purpose-built **material handler** that feature simple-to-use technologies & a redesigned cab from the previous designs. This advanced technology in material loading allows us to work more **efficiently** and much more **safely** with the additional bonus of being able to raise the cab to the side of the artic units to **place** material precisely. A fantastic addition to the waste division.

### **Agricultural Loading Shovel:**

Designed for loading muck, buck raking, pit work, lagoon emptying & general farm applications; our new **JCB 419S** is a fantastic addition to the Agri department. This mid-range loader is **nimble** enough for compact spaces with the thinner **750mm** wide tyres, whilst maintaining its powerful **4T payload**. With a **3.6m buck rake** on the silage clamp, this remarkable piece of machinery continues to **impress** both our team and our customers with its **capabilities**.

## What are Seconds?

Seconds are determined by breakages and minor cracks/chips from the manufacturing process. As a result, none of our seconds stock can be guaranteed.

Please call our sales team in advance if you wish to order seconds, as variations in stock occur daily.

Our Adapter Couplings (AC) band seal range are designed to join two types of pipes with different external diameters.

Our Drain Coupling range (DC) are manufactured to connect, repair & maintain drainage systems and other non-pressurized small diameter pipes.

Both ranges are comprised of nitrile rubber and stainless steel for improved corrosion resistance.

All measurements are given in mm.

## MDPE Pipe Quality

Maximum operating pressures of up to **16 bar** across all sizes. Medium density polyethylene has significant advantages over other pipe materials. These include a **flexible** and **light weight pipe** with excellent **chemical resistance** and ease of **welding** with availability of coils. These properties contribute to its appeal in situations where **cost effective** and **reliable systems** are required.

### **Asbestos 12yard Walk-In Skips:**

With an **increasing** demand for more variations in our **asbestos collection services**, we have invested in additional sealed skips; specifically designed for the collection & transportation of **hazardous** waste such as **asbestos**. Alongside these 12 yards skips we can also offer much larger skips for large scale asbestos removal alongside our handy **asbestos bags**. The bags are priced to include **up to 500kg** of material and are available for **collection** from our main site – **Bensite**, along with all the **corresponding PPE** for handling asbestos.

### **Online Booking System:**

For a **free quote** or more information on our full range of **skips**, why not try our newly revamped website with our **online booking service?**

**[www.arrichards.co.uk](http://www.arrichards.co.uk)**

Glass Waste

Cardboard Farm Waste

Food Waste

Mixed Recycling

General Waste

If you're looking for a **cost-effective** way of **managing your waste** on site, but don't produce enough for a skip; then our range of **euro (wheelie) bins** are ideal for you. Able to hold several separate waste streams such as **general waste**, **recycling**, **glass waste**, **food waste** and a lot more, our bins are **perfect** for a wide array of different **business types**.

### Sizes Include:

240 Litre  
360 Litre  
660 Litre  
1100 Litre

### Bin Lorries:

We offer an inexpensive & reliable service for bin lifts with regular trips in and around Shropshire and all the surrounding counties. With two charities very close to the Richard's family's hearts, we also donate for every single bin lifted by our team. On top of this, our two newest bin lorries have been designed around the two charities.

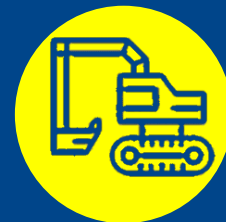

## Inert Waste & Aggregate Collections:

We have two sites, the first being where the builders merchants are based. If you are also looking to **tip off soil, rubble, green waste, plasterboard, or tyres** as well as **collecting your building materials** then we offer a unique **one stop shop** for all of this. If you need more **advice** or want to see what items we **stock**, why not come and see us.

**A R Richards Ltd, Sutton Road, Tern Hill, Market Drayton, Shropshire TF9 2JH**

## General & Farm Waste Disposal:

Our second much larger site is home to the **skip** department, **accounts & waste management facilities**. This site is where all our general waste ends up being **separated, baled and recycled**. If you are looking to see what happens to your **waste** or would like more **information** on **prices** or facilities available, visit:

**A R Richards Ltd, Bensite, Stoke Heath, Market Drayton, Shropshire TF9 2JJ**

### **Screening & Crushing Plant Hire:**

The **Builders merchant** yard is also home to our large **plant hire** machinery. We offer machinery on a **daily hire basis**. Our machines come with **skilled operators** & **fuel** inclusive of the hire price. We offer a **J40 v2 Jaw Crusher** for turning **waste rubble** into a **recycled aggregate** known as **6F2**. This material is used as an **in-fill material**, designed for **large applications**. This can be a **cheaper alternative** on site to **removing waste** from site and then **buying** in more **material**. We also offer a 512R trommel screen designed for **separating** material through a metal **mesh**. The mesh ranges from **10–50mm** in size; meaning you can **separate material** to a **certain size**.

### **360 Excavator Hire:**

We also have an ever-increasing fleet of **excavators** designed for **comprehensive** purposes on **agricultural, construction & demolition** applications. Again, all our machinery comes with an **experienced** and **knowledgeable** machinist, specialising in **site clearances, ground remediation, drainage projects & sleeper laying** services. We offer a **turn-key package** for **agricultural** customers looking to create a sleeper track for livestock. We supply and lay 1000's of sleepers every year to a **professional standard**. Please call our sales team for more **information**.

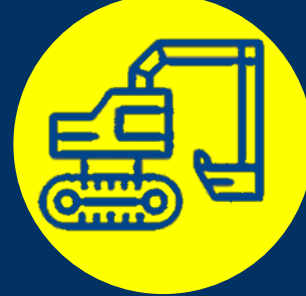

**Site Address:**

Bensite, Warrant Road, Stoke Heath, Market Drayton, Shropshire TF9 2JJ

**Site Address:**

Warrant Hangar, Sutton Road, Tern Hill, Market Drayton, Shropshire TF9 2JH

**Site Address:**

Cobscott, Brand Common, Adderley, Market Drayton TF9 3TW

**If a product or service does not appear in this brochure or you simply would like to know more about one that does, please call our friendly sales team for more information on the matter.**
